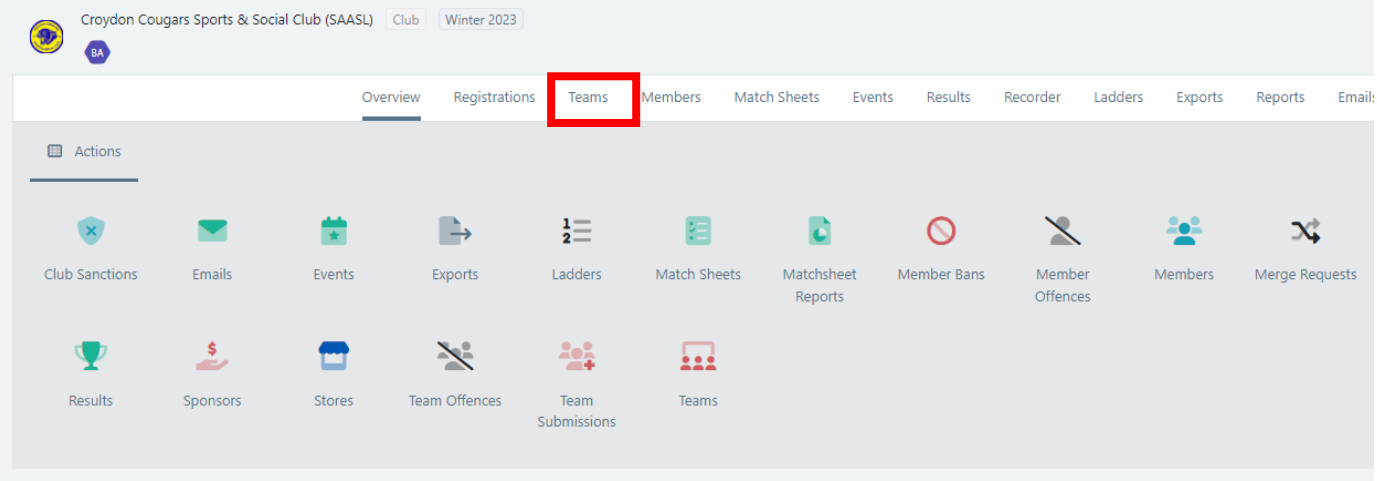
How to Map players to teams

In order for Players and Officials to be selected in the line-up for the Match Sheets on match day, they need to be mapped to teams for the Season.

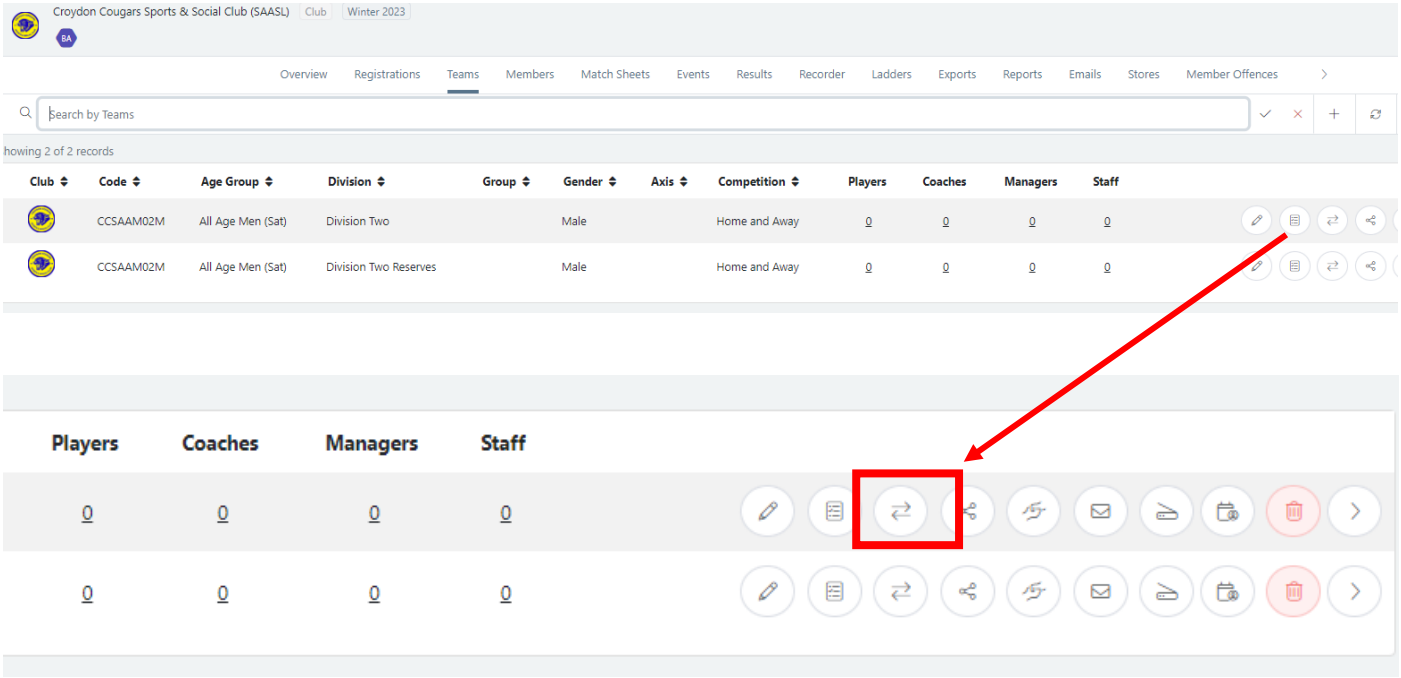
Mapping of your team only needs to be done once at the start of the Season.

Follow the below steps to map Players and Officials.

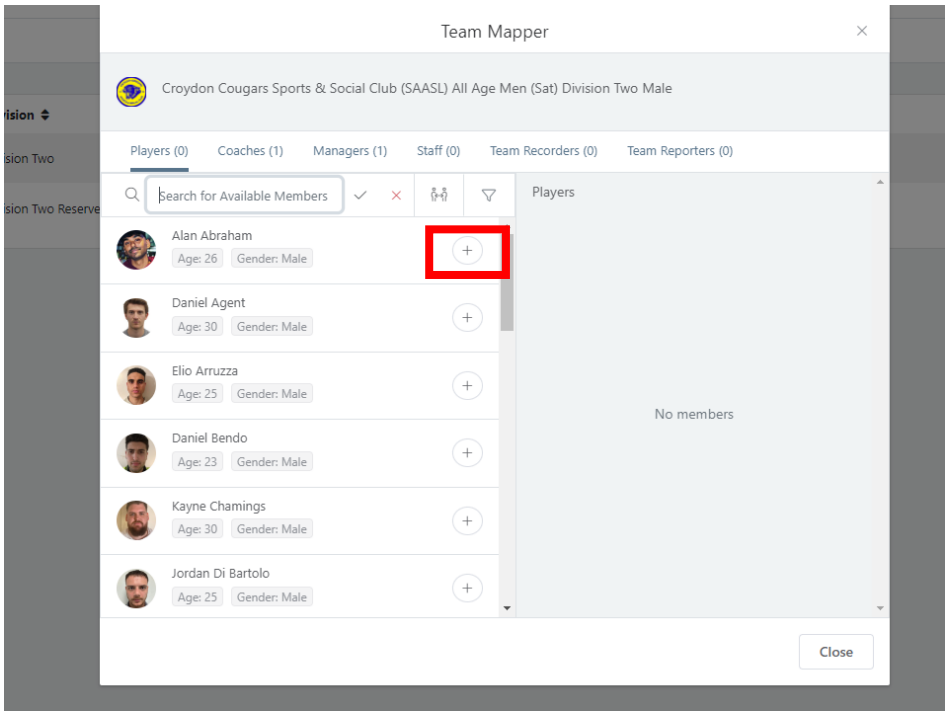
Select your teams

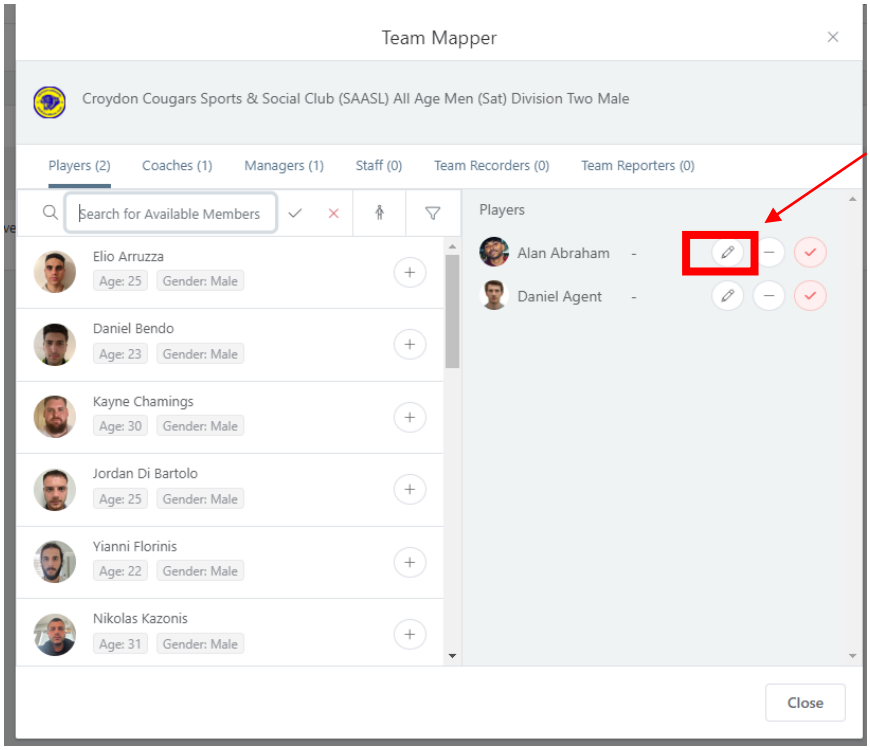


Select which team to map by selecting the **Map Members icon**



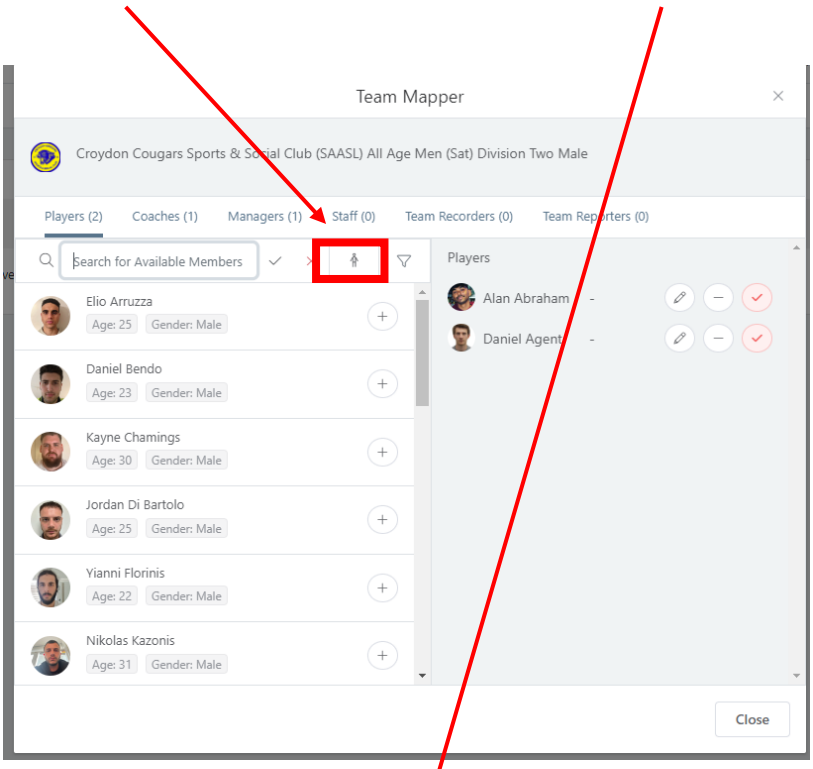
Select the players you want to map the team, by selecting the plus button



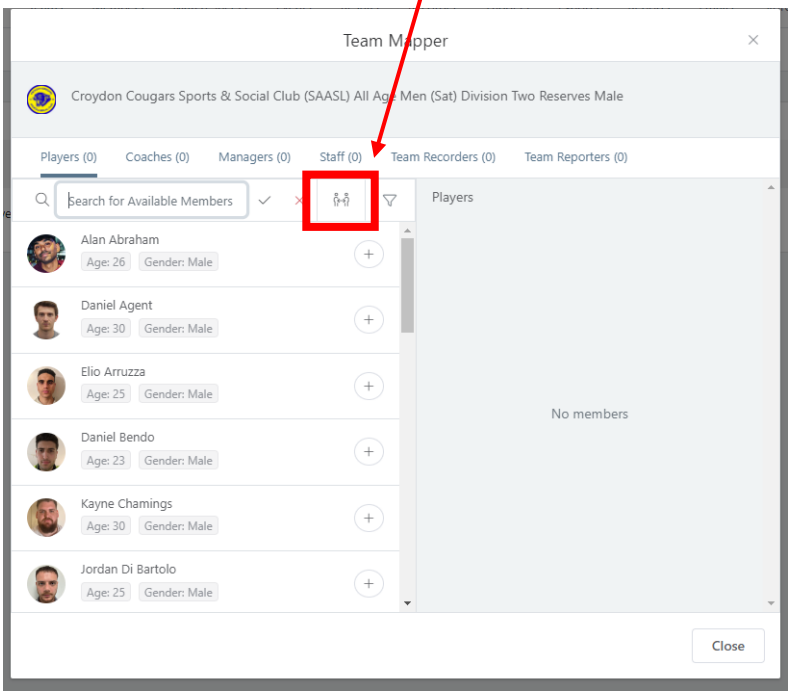


By selecting the pencil icon, you can assign a shirt number for the season

If your Club has several teams, you can list Reserves and C team players in the team mapping by selecting **person icon** on the team mapper and changing it to the **two person icon**



This will then list the players in the new team mapping that are registered to your Club.



Do the same with your Coaches and Managers for each team.

Coaches and Managers who are selected are then also Team Recorders and Team Reporters on the Dribl App. When the Dribl app is downloaded, they are able to use the same email address they have used on PlayFootball to register and be able to access the Match Sheets for each fixture.

Selected Players, Coaches and Managers will have a red tick next to their name until the mapped team is approved by SAASL.

Once your teams have been mapped, email admin@saasl.com.au as the last step is for SAASL to approve your mapped teams so they are visible for your Team selection for your Match Sheets to be completed.
